

Sycloid® Toasters

Elegantly designed and crafted, the revolutionary Sycloid® toaster sets the standard for high speed toast production. The Sycloid's stylish exterior houses a *cleverly engineered machine that provides truly functional energy efficient operation and an outstanding toasting result time after time.*

 **sycloid®**
TOASTER

FEATURES

- Available in red, black or natural colours with the option of either 10 amps producing over 350* slices per hour, or 13 amps, producing over 500* slices per hour.
- All Sycloid toasters deliver excellent toasting results for bread up to 30 mm thickness. As most bread used in buffets is expected to be less than 20 mm thickness, the Sycloid is optimised to deliver its best result for bread of this thickness. It can accommodate slices up to 30 mm.
- Patron and staff safety is paramount and the Sycloid® toaster has been designed with "cool to touch" external surfaces and a lid locking latch.
- Intelligent energy efficient design – an automatic energy-save mode conserves energy during quiet periods by scaling back power consumption and switching off the conveyor when in energy save mode. The intelligent auto-sense feature detects when a new slice of bread is placed in the machine and automatically prepares the machine to toast the bread. The heat setting in this mode is balanced and optimised to ensure quick recovery. Energy save mode can be disabled so the machine runs at full power if desired.
- A user-friendly and reliable speed controller allows adjustment of the toasting time to account for different types of bread to be toasted. The knob setting lock feature allows staff to set the toasting speed, removing the risk of patrons altering the setting.
- Diners can easily see when their toast is ready from across the buffet with the stylishly sculpted toast return chute with LED lighting that provides easy and illuminated viewing of the toast holding bay. The wide opening of the bay allows easy access to toast, which the radiant heat from the elements helps to keep warm.
- Featuring robust stainless steel elements, the Sycloid® toaster also features a modern brushed stainless steel exterior, perfect for disguising finger prints on a machine expected to be heavily used. It also includes a slide-out crumb tray for every-day cleaning and a hinged top cover allowing easy access to clean the inside.
- The Sycloid® toaster produces a beautiful toasting result throughout the entire slice of bread.

*Dependent on bread type.

The Hottest Toaster that's "Cool-to-Touch"
