

Partial cleaning (after each usage)

- 1 Unplug the juicer.
Remove all pulp and seeds from the cone, splash retainer, reamer, strainer and container.
- 2 To obtain a higher yield of juice always control that the strainer is wellcleaned by using a nylon brush.
Put the strainer under running water and use the brush to clean the inside of the strainer. Wipe all parts with a clean damp cloth.
- 3 Reassemble the juicer in the reverse order.

Full cleaning (at the end of the day)

- 1 Unplug the juicer.
Remove the cone and the splash cover by unscrewing the cone. Remove splash retainer, reamer-strainer and container.
- 2 Remove all pulp and seeds from the removed parts.
- 3 All the removed parts may be washed in a commercial dishwasher or hand washed using warm water and liquid detergent. Wipe with a dry cloth.
- 4 Reassemble the juicer in the reverse order.

- i** **Wipe the base and motor shaft** with a clean, soft cloth and a mild, non abrasive detergent. Wipe with a dry cloth.

⚠ **Never put the base under running water and never immerse in water.**
