Contact Grill Station Heat Shield

Contact Grill Stations | Acessories | Heat Shield

Reduce surface temperatures by up to 90°C for improved operator safety. Standard on all GSA models with electronic timers and compatible with all GSA units. Available in two sizes: HS6 (6 Slice GSA) and HS8 (8 Slice GSA).

FEATURES

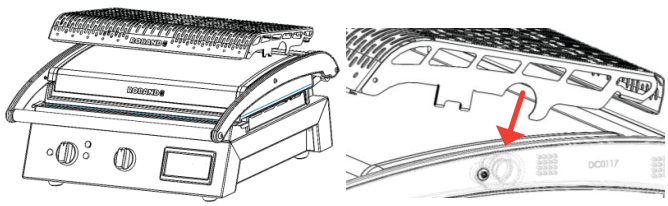

- Reduces surface temperatures by up to 90°C for improved operator safety
- Retrofittable to all GSA models for easy upgrades.
- Simple click-on, click-off design for quick installation and removal for easy cleaning.
- Available in two sizes: HS6 for 6-slice models and HS8 for 8-slice models.
- Constructed from durable 430 stainless steel for long-lasting performance.

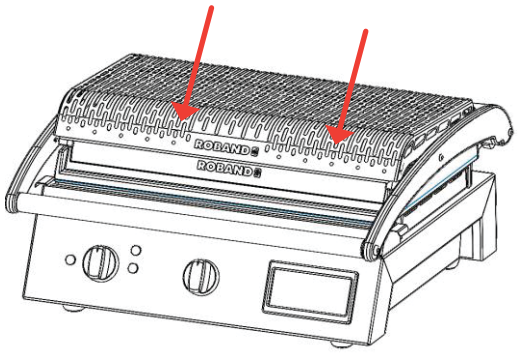

INSTALLATION

1.Grill Station **MUST** be cool to touch before installing.

2. Place heat shield over top cover, aligning centre cutout over the pivot bush.

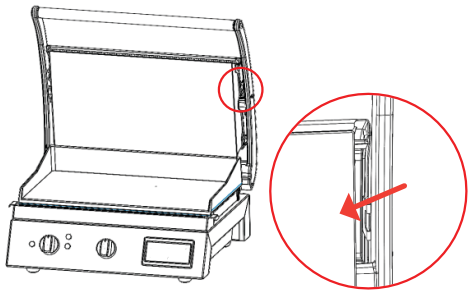

3. Lever heat shield lock tabs over the top cover retainers and slide the heat shield onto the top cover. You will hear a 'click' as the lock tabs engage and the heat shield installation is complete.

REMOVAL

1.Grill Station **MUST** be cool to touch before removing.

2. Open the Grill Station up and locate the Heat Shield locking clips towards the front of the heat shield.

3. Using your fingers, push either the Left or Right clip outward to clear the top cover and lever up at the same time. Repeat the process on the alternate side, then slide away from machine.
